Subject: Re: EPA RPM Coverage

Bob - Elaine handles all the dredging operations and related issues. But given my long history and her being fairly new I've been helping her transition (although not so much any more).

I handle the potential changes to the remedy (cost estimates, CAD cells, ESDs, modeling, etc.) and the litigation reopener.

For Aerovox, the idea is for me to bring the negotiations across the finish line, and to review the various construction submittals, and then Elaine would take over the On Scene Coord. (OSC) role for the day to day construction oversight.

Let me know if I've only confused you!

Dave

Dave:

I found myself not knowing whether to send email/correspond to/with Elaine, yourself or both. Can you outline the coverage between yourself and Elaine?

Certainly Elaine is responsible for the OU3 RI/FS.

Tx

Bob
